CERTIFICATION BULLETIN NO. 2005-07

To: Listees of Automobile Fire Fighting Apparatus

Subject: Second Edition of the Standard for Automobile Fire Fighting Apparatus,
CAN/ULC-S515-04

This is further to our Certification Bulletin 2004-12, dated November 1, 2004, announcing the latest edition of the Standard for Automobile Fire Fighting Apparatus, CAN/ULC-S515-04.

As indicated in November 2004 bulletin, Underwriters' Laboratories of Canada has adopted the provisions of this Edition of the Standard. All new submittals of Automobile Fire Fighting Apparatus will be investigated in accordance with the requirements. We have extended the period for all existing Listings to comply with the requirements from October 30, 2005, to December 31, 2005. Underwriters' Laboratories of Canada has reviewed all currently Listed products and is requiring a manufacturing facility audit and product examination to verify compliance with the construction requirements of this Edition of the Standard.

To assist in complying with these requirements, a Fire Apparatus Manufacturers Construction Audit Checklist has been created. The checklist, which will form the basis for the facility audit and product examination, is enclosed for your reference.
