CERTIFICATION BULLETIN 2007 - 20

To: Members of the Advisory Council of the Underwriters' Laboratories of
Canada
Listees of Check Valves for Fire-Protection Service
Others Interested

Subject: ULC/ORD-C312-07, Check Valves for Fire-Protection Service
CCN: HMERC Guide: (2100 I 22.3)

Dear Members:

ULC is pleased to announce the publication of ULC/ORD-C312-07, Check Valves for Fire-Protection Services.

These new requirements for check valves for fire-protection service are effective upon publication.

ULC/ORD-C312-07 replaces the following ORD, effective immediately:

ORD-C312-1995 Check Valves for Fire-Protection Service

No future effective date is needed for this ORD as C312 has the same requirements as contained in UL 312, which is in effect. Since current ULC Listees also have similar UL Listings, the investigations undertaken for UL listings will be applicable for Canadian certification.

All new submittals of check valves will be investigated to the new requirements in ULC/ORD-C312.

This Certification Bulletin may be forwarded to others who may have an interest in the publication of this document and subsequent withdrawal of above-noted ORD.
