ULC S526

September 28, 2007

**CERTIFICATION BULLETIN NO. 2007- 24**

To: Listees of Visible Signal Devices for Fire Alarm Systems, Including  
Accessories and Other Interested Parties  
CCN: UEJZC, UEESC

Subject: Third Edition of CAN/ULC-S526-07, Visible Signal Devices for Fire Alarm  
Systems Including Accessories.

This is further to our Standards Bulletin 2007-08, dated March 15, 2007, announcing the third edition of the Standard for **Visible Signal Devices for Fire Alarm Systems, Including Accessories**

As indicated in the March Bulletin, Underwriters' Laboratories of Canada has adopted provisions of the Edition of the Standard. All new submittals of **Visible Signal Devices for Fire Alarm Systems, Including Accessories** will be investigated in accordance with these requirements. We expect all existing listings to comply with the new requirements by September 30, 2009. Underwriters' Laboratories of Canada is reviewing all currently listed products and is requiring a manufacturing facility audit and product examination to verify compliance with the construction requirements of this Edition of the Standard.

Sometimes, customers may not choose to continue manufacturing their ULC-certified product after new/revised requirements go into effect. Focusing our file review efforts on only those products that will continue to be ULC certified is one way to reduce your file review costs. To ensure that we're aware of your plans, please provide the information requested in the List of Product Information form for your specific review no later than November 30, 2007. We will omit from the file review all products included on the List of Product Information form, and after the effective date, these products will no longer be considered ULC certified. Please include your authorization to terminate your ULC certification for the noted products as well as the date you wish the termination to go into effect

To assist in complying with these requirements, a Summary of Requirements has been created. This list, which will form the basis of the review and product examination, and the Standards Bulletin 2007-08, are enclosed for your reference.

Please visit our Industry File Review website at <http://ifr.ul.com/> (do not include www in the URL). There, you will have access to the Important Letter that provides information concerning our Industry File Review process. In addition, the Information & Schedule and Summary of Requirements for specific reviews are located on the left hand side of the screen. Using the search function, you can search for these documents by the Action Required Letter Date, Effective Date or Subject Number.

Any questions concerning the above should be directed to Mr. Normand Breton, Chief Engineer, at 416-757-3611 ext. 61238 or [normand.breton@ca.ul.com](mailto:normand.breton@ca.ul.com).
