STANDARDS BULLETIN 2004-14

Fourth Edition of ULC-S127-04

Standard Corner Wall Method of Test for Flammability Characteristics of Non-Melting Building Materials

ULC is pleased to announce the publication of the Fourth Edition of ULC-S127-04, Standard Corner Wall Method of Test for Flammability Characteristics of Non-Melting Building Materials. This Standard has been approved by the ULC Committee on Fire Tests, and has been published with the date of October 2004.

The method of test for flammability characteristics in ULC-S127-04 is applicable to certain low density insulating materials that do not melt or drip during exposure to fire. This test method was developed primarily to assist in the assessment of the flammability of certain low density insulating materials that do not melt or drip during exposure to fire, and for which the test methods CAN/ULC-S102, Standard Method of Test for Surface Burning Characteristics of Building Materials and/or CAN/ULC-S102.2, Standard Method of Test for Surface Burning Characteristics of Flooring, Floor Covering and Miscellaneous Materials and Assemblies, do not offer sufficiently precise results.

This Standard will be of interest to those involved in research and development of building construction materials, fire protection experts, engineers and architects, as well as builders, manufacturers and regulatory officials.

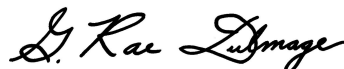

A Certification Bulletin will be released shortly providing further information regarding this Standard. The Certification Bulletin will also specify the effective date for any requirements.

Should you require any additional information, please contact Jennifer Beatty at 613-755-2729 Ext. 6222 or email: jennifer.beatty@ca.ul.com

This Standard can be ordered for \$130.00 through our website at www.ulc.ca by selecting ULC Online Store. Once at the ULC Online Store select "Standards".

Yours truly,
