STANDARDS BULLETIN 2005-08

New Edition to Standard

Fourth Edition of CAN/ULC-S507-05

WATER FIRE EXTINGUISHERS

ULC is pleased to announce the release of the Fourth Edition of CAN/ULC-S507-05, Water Fire Extinguishers. This is a ULC/UL Harmonized Binational Standard and the requirements contained in the recently published Eighth Edition of ANSI/UL 626 are identical to CAN/ULC-S507-05. The Fourth Edition has been approved by the ULC Committee on Portable Fire Extinguishers, and has been published with the date of February 28, 2005.

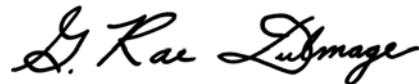

CAN/ULC-S507-05 will be of interest to anyone who manufactures, distributes, regulates or inspects fire extinguishers. These requirements cover the construction and performance, exclusive of performance during fire tests, of water fire extinguishers. Water fire extinguishers are intended to be utilized in accordance with the Standard for Portable Fire Extinguishers, NFPA 10, and the National Fire Code of Canada. These requirements cover stored-pressure, water fire extinguishers that use a single chamber for both the extinguishing agent and the expellant gas. The extinguishers covered by these requirements may be charged with plain water, an antifreeze or a loaded-stream solution. The requirements for performance during fire testing of stored-pressure water fire extinguishers are specified in the Binational Standard for Rating and Fire Testing of Fire Extinguishers, ANSI/UL 711 CAN/ULC-S508.

Should you require any additional information, please contact Monique Grabowski at (613) 755-2729 Ext. 6226 or email: Monique.Grabowski@ca.ul.com.

This Fourth Edition Standard can be ordered for \$145.00 through our website at www.ulc.ca and selecting ULC Online Store. Once at the ULC Online Store select "Standards".

Yours truly,

UNDERWRITERS' LABORATORIES OF CANADA
