## STANDARDS BULLETIN 2007-08

- 
- **Third Edition of CAN/ULC-S525-07, Audible Signal Devices for Fire Alarm Systems, Including Accessories**
  - **Third Edition of CAN/ULC-S526-07, Visible Signal Devices for Fire Alarm Systems, Including Accessories**
  - **Third Edition of CAN/ULC-S541-07, Speakers for Fire Alarm Systems, Including Accessories**
- 

ULC is pleased to announce the publication of the Third Edition of these Standards, which have been approved by the ULC Committee on Fire Alarm Equipment and Systems, and are dated February 2007.

- **CAN/ULC-S525-07:** This Standard covers electrically operated bells, sirens, horns, and similar audible signal devices for fire-protective signalling service.
- **CAN/ULC-S526-07:** This Standard covers visible signal devices for fire-protective signalling service.
- **CAN/ULC-S541-07:** This Standard covers speakers for fire-protective signalling service.

The three Standards also cover protective covers and accessories that are used with the signalling devices. It is intended for the devices covered in the three Standards to be installed in accordance with CAN/ULC-S524-06 (Installation of Fire Alarm Systems) and CSA C22.1, Canadian Electrical Code, Part I.

---

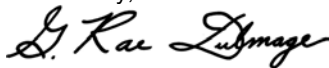

Some of the highlights of changes from the Second edition of all three Standards are:

- The sections on performance and construction have been revised for consistency with other ULC and UL standards.
- Introduction of requirements for protective covers and accessories, which are in common use but previously had no existing standards. This addition has resulted in changes to the title of all three standards.
- Recognition has been given to the fact that technology allows for the signalling devices covered in these Standards to be inseparably linked to their control unit and that these devices must be tested with the control unit.
- Introduction of requirements for manufacturing tests in order to ensure that manufacturers are aware of specific testing (i.e. dielectric voltage-withstand test) and need for maintaining records.
