STANDARDS BULLETIN 2007-22

Sixth Edition of CAN/ULC-S102-07

STANDARD METHOD OF TEST FOR SURFACE BURNING CHARACTERISTICS OF BUILDING MATERIALS AND ASSEMBLIES

ULC is pleased to announce the publication of the Sixth Edition of CAN/ULC-S102, Standard Method of Test For Surface Burning Characteristics of Building Materials and Assemblies. This Standard has been approved by the ULC Committee on Fire Tests, and has been published with the date of August 2007.

This new edition of CAN/ULC-S102 includes some minor technical changes as follows: 1) the Standard now requires that three samples be tested in order to align with the National Building Code; 2) Appendix A for Mounting Methods is now normative in order to improve consistency throughout test labs; and 3) the Standard now requires enhanced instrumentation which will result in better measurements made.

In addition, various changes in terminology, as well as editorial updates have been made.

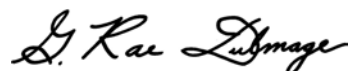

This Standard will be of interest to those involved in research and development of building construction materials, fire protection experts, engineers and architects, as well as builders and manufacturers.

Should you require any additional information, please contact Jennifer Jimenez at 613-755-2729 Ext. 6222 or email: jennifer.jimenez@ca.ul.com.

This Standard can be ordered for \$175.00 through our website at www.ulc.ca by clicking on Order Standards and Directories and then selecting ULC Online Store.

Yours truly,
