STANDARDS BULLETIN 2007-27

Fifth Edition of CAN/ULC-S127-07

STANDARD CORNER WALL METHOD OF TEST FOR FLAMMABILITY CHARACTERISTICS OF NON-MELTING FOAM PLASTIC BUILDING MATERIALS

ULC is pleased to announce the publication of the Fifth Edition of CAN/ULC-S127, Standard Corner Wall Method of Test for Flammability Characteristics of Non-Melting Foam Plastic Building Materials. This Standard has been approved by the ULC Committee on Fire Tests, and has been published with the date of August 2007.

This new edition of CAN/ULC-S127 includes revisions to align with the latest editions of CAN/ULC-S102 and CAN/ULC-S102.2. Additionally, this Standard has a revised title and is now a National Standard of Canada (it was formerly known as *ULC-S127, Standard Corner Wall Method of Test for Flammability Characteristics of Non-Melting Building Materials*).

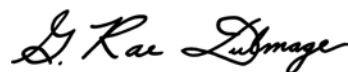

This Standard will be of interest to those involved in research and development of building construction materials, fire protection experts, engineers and architects, as well as builders and manufacturers.

Should you require any additional information, please contact Jennifer Jimenez at 613-755-2729 Ext. 6222 or email: jennifer.jimenez@ca.ul.com.

This Standard can be ordered for \$175.00 through our website at www.ulc.ca by clicking on Order Standards and Directories and then selecting ULC Online Store.

Yours truly,

UNDERWRITERS' LABORATORIES OF CANADA
