

## 2010 UL Fire-Related Directories – Vista 64bit

*USER MUST HAVE ADMIN RIGHTS*

*VISTA's User Account Control must be turned on. It is by default.*

*ALL STEPS MUST BE FOLLOWED*

1. Insert the UL CD
2. If necessary, cancel the autorun
3. Go to Computer, right click on the UL cd, choose Explore
4. On the UL cd locate setup.exe (32-bit Setup Launcher), right click and choose Properties
5. In Properties select the Compatibility tab:
  - put a check in "Run this program in compatibility mode for: Windows XP (Service Pack 2):
  - put a check in "Run this program as an administrator"
  - Click Apply and OK; You should be returned to the cd file list
6. Right click on Setup.exe and choose "Run as administrator"
7. During the installation:
  - Welcome Screen, click Next
  - Choose Destination Location Screen – Follow these instructions:
    - Click Browse
    - In the Directories box, select c:\users\*(choose your name)*
    - In the Path box, add \UL2010FireRelated
    - Click OK; choose Yes to create new folder
    - You should be returned to the Choose Destination Location Menu
    - Click Next
    - Choose Singler User
    - Choose Copy to Hard Drive
    - Follow the rest of the defaults
8. After the installation is complete, click Finish
9. At this time, close all windows that were opened during the installation process.
10. Go to the Desktop, find the 2010 UL Fire-Directories Shortcut, right click and choose Properties
11. In Properties select the Compatibility tab:
  - put a check in "Run this program in compatibility mode for: Windows XP (Service Pack 2):
  - put a check in "Run this program as an administrator"
  - Click on "Show settings for all users"
  - put a check in "Run this program in compatibility mode for: Windows XP (Service Pack 2):
  - put a check in "Run this program as an administrator"
  - Click Apply and OK
  - Again, Click Apply and OK on the UL Properties Screen
12. Go to Desktop and click on the 2010 UL Fire-Related Directories shortcut.
