

CORRELATION OF USE MARKING AND NEW PRODUCT IDENTITY TEXT

The Product Identity of the Listing Mark for products in this file has been revised with the transition to the new Product Identity to be completed by December 31, 2008. In conjunction with the implementation of the new Type R Listing Mark Product Identity covered on the new Listing Mark Data Page(s), which have been added to this File, it is required that the use marking described below is employed on *each model* at the time the new Type R Marks are introduced. The products are eligible to use the previous Listing Mark Product Identity until December 31, 2008.

Each unit shall be marked with the applicable use marking indicated in the table below followed by the specific use description covered in the description section for the unit.

The following table correlates the new required use marking with the product identity (Listing Mark text) of the previous Type R Listing Mark. If more than one product identity was previously applicable, the new use marking texts shall be combined (See below for examples).

CCN	Previous Product Identity for Type R label Text	New Product Identity for Type R Listing Mark	New Required Use Marking Examples
APOU / APOU7	"Commercial Burglar Alarm System Unit" or the specific product name or designation as shown in the individual Listings	"Equipment"	<p>"Commercial" and "Burglar Alarm System Control Unit," or the specific product name or designation as covered in the description section for unit.</p> <p style="text-align: center;">Examples: Commercial, Proprietary, Multiplex, Burglar Alarm System Unit</p> <p style="text-align: center;">Commercial, Proprietary, Burglar Alarm System, Keypad</p>

APOU / APOU7	"Commercial Burglar Alarm System Unit Subassembly" or the specific product name or designation as shown in the individual Listings	"Subassembly"	"Burglar Alarm System Control Unit" or the specific product name or designation as covered in the description section for unit. Example: Commercial, Proprietary, Central Network Controller
ALVY	"Access Control Unit" or appropriate product identities, as shown in the individual Listing	"Equipment"	"Access Control Unit" or appropriate product identities, as shown in the description section of the report.
ALVY	"Access Control Unit Subassembly", "Access Control System Subassembly" or "Access Control System Enclosure" or "Access Control Unit Enclosure," or "Access Control System Enclosure Part" or "Access Control Unit Enclosure Part" or the specific product name or designation as shown in the individual Listings	"Subassembly"	"Access Control Unit" or appropriate product identities, as shown in the description section of the report. Examples: Access Control Unit Enclosure, Access Control Unit Keypad, etc
AMCX/AMCX7, AOTX/AOTX7, APAW, APAW7	"Burglar Alarm System Control Unit"	"Equipment" or "Subassembly"	The specific product name or designation covered in the description section for the unit.

ANET	"Holdup Alarm Unit", or the specific product name or designation as shown in the individual Listing.	"Equipment" or "Subassembly"	"Holdup Alarm Unit", or as covered in the description section for the unit. Example: Commercial, Hold Up Initiating Device
CYPU	The name or designation of the specific type of product as shown in the individual Listings,	"Equipment" or "Subassembly"	The specific product name or designation as covered in the description section for unit. Examples - Surveillance Camera Unit Surveillance Camera Controller
UOJZ/UOJZ7	"Signal System Control Unit"	"Fire Alarm Equipment"	Each unit shall be marked "Commercial Fire," the applicable use marking indicated for the complementary Listed categories, and either "Protected Premise Control Unit" or "Supervising Station Control Unit," as covered in the description section for the unit.

UOJZ/UOJZ7	"Signal System Control Unit Subassembly", "Signal System Control Unit Enclosure", or "Signal System Control Unit Enclosure Part"	"Fire Alarm Subassembly"	All subassemblies marked "Commercial Fire" Key subassembly use marking will include the following: "Commercial," the applicable use marking indicated for the complementary Listed categories, and either "Protected Premise Control Unit" or "Supervising Station Control Unit," as covered in the description section for the unit.
UOXX/UOXX7	"Signaling Device", "Signaling Device Subassembly," "Signaling Device Enclosure," or "Signaling Device Enclosure Part"	"Fire Alarm Equipment" or "Fire Alarm Subassembly"	"Signaling Device", "Signaling Device Subassembly," "Signaling Device Enclosure," or "Signaling Device Enclosure Part" or the specific product name or designation covered in the description section for the unit. (i.e. annunciator, operator interface, etc.)
UTOU/UTOU7	"Household Fire Warning System Control Unit," "Household Fire Warning System Control Unit for Use with Listed Modules,"	"Fire Alarm Equipment" or "Fire Alarm Subassembly"	"Residential" or "Household" and the specific product name or designation covered in the description section for the unit.

UEHX/UEHX7	"Signal Appliance"	<p>"Emergency Signaling Equipment" for products rated Type UM, SM, and AM or critical process monitoring.</p> <p>"General Signaling Equipment" for units rated Type NM or non-critical monitoring.</p> <p>Note: Ratings are covered in description section for product. Products may have one or both ratings.</p>	<p>Use marking [Type NM, UM, SM, or AM] included in description section for unit.</p> <p>Key subassembly use marking will include the following: Use marking [Type NM, UM, SM, or AM] included in description section for unit.</p>
UEHX/UEHX7	"Signal Appliance Subassembly," "Signal Appliance Enclosure," and "Signal Appliance Enclosure Part"	<p>"Emergency Signaling Subassembly" for products rated Type UM, SM, and AM or critical process monitoring.</p> <p>"General Signaling Subassembly" for units rated Type NM or non-critical monitoring.</p> <p>Note: Ratings are covered in description section for product. Products may have one or both ratings.</p>	<p>Key subassembly use marking will include the following: Use marking [Type NM, UM, SM, or AM] included in description section for unit.</p>

UUTV	<p>"FIRE ALARM SIGNAL TRANSMITTER", "SUPERVISORY SIGNAL TRANSMITTER", "FIRE ALARM AND SUPERVISORY SIGNAL TRANSMITTER", "SUPPLEMENTARY FIRE ALARM SIGNAL TRANSMITTER", "SIGNAL TRANSMITTER ACCESSORY", or "SIGNAL TRANSMITTER ENCLOSURE".</p>	<p>"Fire Alarm Equipment" or "Fire Alarm Subassembly"</p>	<p>One of the following designations as appropriate: "Fire Alarm Signal Transmitter", "Supervisory Signal Transmitter" , "Fire Alarm And Supervisory Signal Transmitter" , "Supplementary Fire Alarm Signal Transmitter" , "Signal Transmitter Accessory" , "Signal Transmitter Enclosure".</p>
