

What is the UL 48 SignSmart App?

Empowering Trust™

The UL 48 Sign Smart App is a practical tool designed to help answer questions such as:

- What do I need to do to become eligible for UL's General Coverage sign program?
- What types of signs can I make under General Coverage?
- Can the specific sign I'm designing be eligible for General Coverage?
- Do I have to submit the sign for engineering evaluation at UL?

The SignSmart app also provides convenient access to UL resources and services such as the iQ for Sign Component database, and on-line training. The app has been optimized to adapt to your smart device screen size and a new navigation menu makes it easier to use each specific feature of the app independently.

Note:

- A UL account and login is required to use the app
- This app does not determine compliance with UL 48. All general coverage signs constructions must undergo complete evaluation as prescribed in the UL 48 FUII.

Search for "SignSmart" at [UL.com/lms](https://www.ul.com/lms) to download and install the SignSmart app today.
