

**Jürgen Henschel, Director and GM,
Engineered Materials, EMEA, UL**

Dr.-Ing. Henschel joined UL in 2017 in the role of being the EMEA Director and Regional GM for the Material Testing Business. In his assignment he is responsible for the P&L, leading the regional Engineering team, located in four countries, the regional operations as well as Sales and Procurement. In 2021 his area responsibility was enlarged with the integration of the Wire & Cable Business in EMEA.

Jürgen has a strong drive for customer service and business process improvement. He is experienced in building and leading cross-functional and multi-cultural teams.

Before joining UL, he lead a team of more than 250 Engineers, working in global teams for the Automotive and Datacom Industry. The expertise build includes the redesign and turnaround of large scale product development organizations. The transition from local / regional acting and thinking to global execution was his major achievement in that role.

Prior to that he collected over 10 years of experience in Supply Chain Management in the Automotive Industry. Jürgen held several operational and strategic management positions across Planning, Sourcing, Manufacturing, Logistics and Customer Service, both in local as well as in Regional functions. His expertise includes initiatives such as customer service excellence, supply chain process definition and re-engineering from concept to design and implementation. Furthermore he collected experience in logistics integration in the course of M&A's, sales & operations planning, logistics services, process maturity assessments, and inventory management.

Jürgen received his degree in Mechanical Engineering from the Clausthal University, Institute of Mechanical Engineering (IMW), Germany. Additionally, he is an educated SixSigma Green Belt, lecturer in MBA courses in Switzerland (ETH & HSG) and actively engaged in developing possibilities to continuously enhance the knowledge of his teams.
